Going **beyond** the "lift and shift" solutions

Cloud Engineering

Whether your organization is taking its first cloud migration steps, analyzing cloud spend, deploying mission-critical workloads into classified cloud environments, or exploring the latest in cloud-based deep learning libraries, we have the cloud experience to solve your mission needs. Our comprehensive, engineering-based approach lets agencies maximize efficiency and transform the way they deliver services.

We help customers:

- Improve security
- Increase agility
- Shorten release cycles
- Reduce costs and overhead

LOW AND HIGH SIDE CLOUD EXPERIENCE

- Azure
- AWS
- Google
- C2E
- Air Gapped Cloud Emulation

APP MODERNIZATION FOR NATIVE CLOUD APP DEV

- DevSecOps
- Microsoft Dynamics
- ServiceNow

DATA CENTER OPERATIONS

- OS Engineering: Windows/Linux
- Virtualization Engineering
- Storage Engineering
- Network Engineering
- System Administration

BIG DATA IN THE CLOUD

- Access to massive data stores anywhere
- Ground Station As a Service via Azure Orbital or AWS Ground Station access

CLOUD SECURITY

- Security and Information Event Management (SIEM) engineering, administration, and analysis
  - Splunk
  - LogRhythm
- DevSecOps
